CONTENTS OF VOLUME 83 Nos 1–36

NUMBER 1—1 JANUARY

Degree of structural perfection of icosahedral quasicrystalline grains investigated by synchrotron X-ray diffractometry and imaging techniques
J. Gastaldi, S. Agliozzo, A. Létoublon, J. Wang, L. Mancini, H. Klein, J. Härtwig, J. Baruchel, I. R. Fisher, T. Sato, A. P. Tsai and A. M. de Boissieu 1

Transmission electron microscopy investigation of an ordered metastable phase in Zr–N alloys
S. S. Sharma, K. T. Moore and J. M. Howe 31

Stress-induced phase transformations in (001)-oriented $Pb(Mg_{1/3}Nb_{2/3})O_3$–$PbTiO_3$ crystals: bilinear coupling of ferroelastic strain and ferroelectric polarization
D. Viehland and J. F. Li 53

One-dimensional atomic transport by clusters of self-interstitial atoms in iron and copper
Yu. N. Osetsky, D. J. Bacon, A. Serra, B. N. Singh and S. I. Golubov 61

Correlation between yttrium segregation at the grain boundaries and the threshold stress for plasticity in yttria-stabilized tetragonal zirconia polycrystals
D. Gómez-García, C. Lorenzo-Martín, A. Muñoz-Bernabé and A. Domínguez-Rodríguez 93

Point-defect concentrations in B2 NiAl alloys under pressure
G. Erdélyi, Cs. Guthy and D. L. Beke 109

Indentation behaviour of porous materials: application to the Vickers indentation cracking of ceramics
F. Tancret and F. Osterstock 125

Modelling the toughness of porous sintered glass beads with various fracture mechanisms
F. Tancret and F. Osterstock 137

NUMBER 2—11 JANUARY

Extended vacancy-type defects in silicon induced at low temperatures by electron irradiation
J. Yamasaki, Y. Ohno, S. Takeda and Y. Kimura 151

Synthesis and characterization of mixed-valence barium titanates
T. Höche, P. Olhe, R. Keding, C. Rüssel, P. A. van Aken, R. Schneider, H.-J. Kleebe, X. Wang, A. J. Jacobson and S. Stemmer 165

Kear–Wilsdorf locks and the generation of antiphase-boundary tubes in $L1_2$ alloys
Y.-L. Chiu and P. Veyssière 179

Multistage devitrification of Mg–Ni–Mm and Mg–Ni–Y–Mm metallic glasses (Mm = misch metal)
D. V. Louzguine, L. V. Louzguina and A. Inoue 203

First-principles investigations of ordering in binary α-Ti solid solutions
Q. M. Hu, D. S. Xu, R. Yang, D. Li and W. T. Wu 217

On the measurement of dislocation core distributions in a GaAs/ZnTe/CdTe heterostructure by high-resolution transmission electron microscopy
S. Kret, P. Dłużewski, P. Dłużewski and J.-Y. Laval 231

Plastic slip distribution in two-phase laminate microstructures: dislocation-based versus generalized-continuum approaches
S. Forest and R. Sedláček 245

Effect of microcracking on electric-field-induced stress intensity factors in dielectric ceramics
C. Q. Ru and S. X. Mao 277

NUMBER 3—21 JANUARY

The paramagnetic-to-ferromagnetic transition in B2-structured Fe–Al single crystals: experiments and calculations
D. Wu, P. R. Munroe and I. Baker 295

Relaxation kinetics of the long-range order parameter in a non-uniform system studied by the phase field method using the free energy obtained by the cluster variation method
M. Ohno and T. Mohri 315

Ni diffusion in near-equiatomic Ni–Ti and Ni–Ti(–Cu) alloys
J. Bernardini, C. Lexcellent, L. Daróczi and D. L. Beke 329

Multiple-step martensitic transformations in Ni-rich NiTi alloys—an *in-situ* transmission electron microscopy investigation
A. Dlouhy, J. Khalil-Allafi and G. Eggeler 339

Density functional theory studies of screw dislocation core structures in bcc metals
S. L. Frederiksen and K. W. Jacobsen 365

Computer simulation of solute-enhanced diffusion kinetics in dilute fcc alloys
I. V. Belova and G. E. Murch 377

Solvent diffusion kinetics in the dilute random alloy
I. V. Belova and G. E. Murch 393

Effects of pressure on high-temperature dislocation creep in olivine
S. Karato and H. Jung 401

NUMBER 4—1 FEBRUARY

Atomistic modelling of TiAl I. Bond-order potentials with environmental dependence
S. Znam, D. Nguyen-Manh, D. G. Pettifor and V. Vitek 415

Microstructural aspects of the hcp–fcc allotropic phase transformation induced in cobalt by ball milling
J. Sort, J. Nogués, S. Suriñach and M. D. Baró 439

Evolution of texture in electrodeposited Ni/Cu layered nanostructures
F. Ebrahimi, A. J. Liscano, D. Kong and V. Krishnamoorthy 457

Self-diffusion of aluminium in the intermetallic compound Fe–48 at.% Al
R. Nakamura and Y. Iijima 477

Dislocation configurations around a nanoindentation in the surface of a fcc metal
O. Rodríguez de la Fuente, M. A. González and J. M. Rojo 485

Elastic-stiffness coefficients of a silicon carbide fibre at elevated temperatures: acoustic spectroscopy and micromechanics modelling
H. Ogi, S. Kai, T. Ichitsubo, M. Hirao and K. Takashima 503

Investigation of domain behaviour in $0.7Pb(Mg_{1/3}Nb_{2/3})O_3$–$0.3PbTiO_3$ single crystals at different temperatures in the transmission electron microscope
X. Meng, K. Z. Baba-Kishi, G. K. H. Pang, H. L. Chan, C. L. Choy and H. S. Luo 513

Occurrence of superconductivity in $R_{2-z}Ce_zCuO_4$ and related compounds
J. D. Dow and M. Lehmann 527

NUMBER 5—11 FEBRUARY

Periodic image effects in dislocation modelling
W. Cai, V. V. Bulatob, J. Chang, J. Li and S. Yip 539

Two-dimensional lattice models of the Peierls type
A. B. Movchan, R. Bullough and J. R. Willis 569

Thermodynamics and point defects in the B2 intermetallic phase PdIn
M. Huang, W. A. Oates and Y. A. Chang 589

The determination of stresses in thin films; modelling elastic grain interaction
U. Welzel, M. Leoni and E. J. Mittemeijer 603

Thermal shock fracture of piezoelectric materials
B. L. Wang and Y.-W. Mai 631

Possible electron–phonon interaction-driven microscopic origin of the phase transitions in β-$Na_{0.33}V_2O_5$ and analogues
A. Bussmann-Holder 659

NUMBER 6—21 FEBRUARY

Vacancy ordered phases in Al–Cu–Ni as quasiperiodic superlattice approximants
A. Subramaniam 667

***In-situ* small-angle X-ray scattering study of dynamic precipitation in an Al–Zn–Mg–Cu alloy**
A. Deschamps, F. Bley, F. Livet, D. Fabregue and L. David 677

Cyclic deformation of polycrystalline Cu films
R. Schwaiger, G. Dehm and O. Kraft 693

Connectivity and percolation in simulated grain-boundary networks
C. A. Schuh, R. W. Minich and M. Kumar 711

Competitive segregation of gallium and indium at heterophase Cu–MnO interfaces studied with transmission electron microscopy
S. Mogck, B. J. Kooi and J. Th. M. De Hosson 727

Combined mode-I and mode-II fracture of ceramics with crack-face grain and/or whisker bridging
T. Akatsu, K. Saito, Y. Tanabe and E. Yasuda 745

Investigation of nanocrystalline $CoFe_2O_4$ by positron annihilation lifetime spectroscopy
S. Bandyopadhyay, A. Roy, D. Das, S. S. Ghugre and J. Ghose 765

Electron correlation and hybridization in late-transition-metal compounds
I. Pollini 775

Orbital Zeeman effect: signature of charge in the carriers of ferromagnetism
P. F. Farinas and K. S. Bedell 789

Electric-field-dependent dispersive transport of carriers in band tails of low-dimensional systems
M. R. Singh 797

NUMBER 7—1 MARCH

Al–Mn–Ce quasicrystalline composites: phase formation and mechanical properties
F. Schurack, J. Eckert and L. Schultz 807

Microstructural characterization of rapidly solidified $Al_{90}Ce_{10}$ alloy
Z. H. Zhang, X. F. Bian and Y. Wang 827

Electron microscopy analysis of debris produced during diamond polishing
F. M. van Bouwelen, J. E. Field and L. M. Brown 839

Point-defect clusters and dislocation loops in bcc metals: continuum and atomistic study
M. A. Puigvi, Yu. N. Osetsky and A. Serra 857

Crack extension force and rate of mechanical work of fracture in linear dielectrics and piezoelectrics
F. Guiu, M. Algueró and M. J. Reece 873

Creating and destroying vacancies in solids and non-equilibrium grain-boundary segregation
T. Xu 889

Hopping transport in molecularly doped polymers: joint modelling of positional and energetic disorder
J. M. Sin and Z. G. Soos 901

Comment on 'Oriented domains in a thin film of $La_{0.8}Sr_{0.2}MnO_3$ prepared by laser molecular-beam epitaxy' by X. L. Ma, Y. L. Zhu, X. M. Meng, H. B. Lu, F. Chen, Z. H. Chen, G. Z. Yang and Z. Zhang
I. MacLaren 929

Oriented domains in a thin film of $La_{0.8}Sr_{0.2}MnO_3$—Reply to the comment by Dr I. MacLaren
X. L. Ma 933

NUMBER 8—11 MARCH

Crystallography of nanometre-sized α'-martensite formed at intersections of mechanical γ-twins in an austenitic stainless steel
T. Inamura, K. Takashima and Y. Higo 935

***In-situ* transmission electron microscopy observations and molecular dynamics simulations of dislocation–defect interactions in ion-irradiated copper**
J. S. Robach, I. M. Robertson, B. D. Wirth and A. Arsenlis 955

Extended planar boundary inclinations in fcc single crystals and polycrystals subjected to plane strain deformation
J. A. Wert and X. Huang 969

Effect of in-plane residual stresses on the post-deflection behaviour of a T-shaped deflected crack in layered systems
W. Lee and H. Shin 985

Kear–Wilsdorf locks and the formation of antiphase-boundary tubes in $L1_2$ alloys
P. B. Hirsch 1007

Evolution of dislocation substructure in vapour-deposited lead films on glass substrates
P. Chatterjee and S. P. Sen Gupta 1033

Electron-optical phase shift of magnetic nanoparticles I. Basic concepts
M. Beleggia and Y. Zhu 1045

NUMBER 9—21 MARCH

Intermediate stages of a transformation between a quasicrystal and an approximant including nanodomain structures in the Al–Ni–Co system
M. Döblinger, R. Wittmann, D. Gerthsen and B. Grushko 1059

A thermodynamic approach to grain growth and coarsening
F. D. Fischer, J. Svoboda and P. Fratzl 1075

Nucleation behaviour and anomalous eutectic formation in highly undercooled Fe_2O_3–La_2O_3 eutectic melts
M. Li, K. Nagashio and K. Kuribayashi 1095

Observations of glide and decomposition of $a\langle 101 \rangle$ dislocations at high temperatures in Ni–Al single crystals deformed along the hard orientation
R. Srinivasan, M. S. Daw, R. D. Noebe and M. J. Mills 1111

Annealing effects on the microstructure of sputtered gold layers on oxidized silicon investigated by scanning electron microscopy and scanning probe microscopy
J. L. Plaza, S. Jacke, Y. Chen and R. E. Palmer 1137

Electron-optical phase shift of magnetic nanoparticles II. Polyhedral particles
M. Beleggia, Y. Zhu, S. Tandon and M. De Graef 1143

***Ab initio* modelling of band states in doped diamond**
A. S. Barnard, S. P. Russo and I. K. Snook 1163

NUMBER 10—1 APRIL

Structure and role of the interfacial layers in VC-rich WC–Co cermets
S. Lay, J. Thibault and S. Hamar-Thibault 1175

Undissociated screw dislocations in silicon: calculations of core structure and energy
L. Pizzagalli, P. Beauchamp and J. Rabier 1191

Surface deformation induced by a variation in surface stresses in anisotropic half-regions
H. Koguchi 1205

Symmetry analysis of the interplay between local moment anisotropies and propagation vectors in the borocarbides
A. S. Wills, C. Detlefs and P. C. Canfield 1227

Gap closure in semiconducting APtSn cubic compounds (A = U, Th or Zr)
R. Troć, A. M. Strydom, P. de V. du Plessis, V. H. Tran, A. Czopnik and J. K. Cockroft 1235

On the calculation of the magnetoresistance of tunnel junctions with parallel paths of conduction
K. Wang, P. M. Levy, S. Zhang and L. Szunyogh 1255

NUMBER 11—11 APRIL

Synthesis and mechanical properties of mechanically alloyed Al–Cu–Fe quasicrystalline composites
F. Schurack, J. Eckert and L. Schultz 1287

Microstructural accommodation of excess Ru in epitaxial $SrRuO_3$ films
S. H. Oh and C. G. Park 1307

Nucleation of kink pairs on partial dislocations: a new model for solution hardening and softening
T. E. Mitchell, P. M. Anderson, M. I. Baskes, S. P. Chen, R. G. Hoagland and A. Misra 1329

The nucleation of faulted dipoles at intersection jogs in γ-TiAl
Y.-L. Chiu, F. Grégori, T. Nakano, Y. Umakoshi and P. Veyssière 1347

On conservation integrals in micropolar elasticity
V. A. Lubarda and X. Markenscoff 1365

Transport and dielectric properties of V_2O_5–MnO–TeO_2 glasses
M. Pal, K. Sega, B. K. Chaudhuri and H. Sakata 1379

Minimal perimeter for N identical bubbles in two dimensions: calculations and simulations
S. J. Cox, F. Graner, M. F. Vaz, C. Monnereau-Pittet and N. Pittet 1393

NUMBER 12—21 APRIL

Grain boundary structure of nanocrystalline Cu processed by cryomilling
J. Y. Huang, X. Z. Liao, Y. T. Zhu, F. Zhou and E. J. Lavernia 1407

Plasticity of ferromagnets near the Curie point
M. Molotskii and V. Fleurov 1421

Strong magnetization by antiphase-boundary tubes in a cyclically deformed Fe–35 at.% Al alloy
K. Yamamoto, S. Miyazaki, S. Kumai and A. Sato 1431

Determination of the B1–B2 transition path in RbCl by Möbius pair potentials
S. Zhang and N. Chen 1451

$\{101\}\langle 10\bar{1}\rangle$ twins in Mo-doped $TiSi_2$ thin films with the C54 structure
H. Inui, N. L. Okamoto, T. Hashimoto, K. Tanaka and M. Yamaguchi 1463

Interaction of twin boundaries with stacking faults in 2H martensite: a high-resolution electron microscopy study
A. M. Condó, F. C. Lovey and V. Torra 1479

Magnetic and structural behaviours of nanocrystalline $Fe_{70.8}Nb_{3.7}Cu_1Al_{2.7}Mn_{0.7}Si_{13.5}B_{7.6}$ alloy
A. Mitra, A. K. Panda, S. R. Singh, V. Rao and P. Ramachandrarao 1495

NUMBER 13—1 MAY

Thermophysical properties of undercooled liquid Co–Mo alloys
X. J. Han and B. Wei 1511

A new empirical potential for simulating the formation of defects and their mobility in uranium dioxide
N.-D. Morelon, D. Ghaleb, J.-M. Delaye and L. Van Brutzel 1533

Grain-boundary dislocations and enhanced diffusion in nanocrystalline bulk materials and films
I. A. Ovid'ko and A. G. Sheinerman 1551

High-resolution identification of $\frac{1}{2}\langle 110\rangle$ stacking faults in epitaxial $Ba_{0.3}Sr_{0.7}TiO_3$ thin films
C. J. Lu, L. A. Bendersky, K. Chang and I. Takeuchi 1565

Three-dimensional phase field microelasticity theory of a multivoid multicrack system in an elastically anisotropic body: model and computer simulations
Y. M. Jin, Y. U. Wang and A. G. Khachaturyan 1587

Magnetism in a $UNi_{2/3}Rh_{1/3}Al$ single crystal
A. V. Andreev, V. Šechovský, K. Prokeš, Y. Homma, O. Syshchenko, J. Šebek, M. I. Bartashevich, T. Goto, Y. Shiokawa and K. Jurek 1613

Evidence of reduction in spin disorder by Ho^{3+} doping in $La_{0.7}Ca_{0.3}MnO_3$
M. S. Ramachandra Rao, V. Ravindranath and R. Gross 1631

NUMBER 14—11 MAY

Studies of threading dislocations in Nb(011) films
R. S. Appleton, W. Swiech, M. Ondrejcek and C. P. Flynn 1639

Indentation-induced deformations of GaAs(011) at a high temperature
L. Largeau, G. Patriarche, E. Le Bourhis, A. Rivière and J. P. Rivière 1653

Grain-boundary sliding in elongated microstructures during diffusion creep
B.-N. Kim, K. Morita, K. Hiraga and B.-W. Ahn 1675

Atomic mechanism of the Re and Ru strengthening effect on the γ–γ' interface of Ni-based single-crystal superalloys: a first-principles study
K. Chen, L. R. Zhao and J. S. Tse 1685

Intralamellar dislocation networks formed by glide in γ-TiAl
I. The mechanism of formation
A. Couret, H. A. Calderon and P. Veyssière 1699

A quantitative assessment of the three-dimensional microstructure of a γ–γ' alloy
A. C. Lund and P. W. Voorhees 1719

Initial electron back-scattered diffraction observations of cerium
C. J. Boehlert, J. D. Farr, R. K. Schulze, R. A. Pereyra and J. A. Archuleta 1735

Erratum 1745

NUMBER 15—21 MAY

Microstructure and mechanical properties of a partially crystallized La-based bulk metallic glass
J. Basu, N. Nagendra, Y. Li and U. Ramamurty 1747

Shear stress at the interface of coaxial composites determined by the resonance of low-amplitude vibrations
E. B. Hermida and D. G. Melo 1761

Application of the cluster variation method to an interstitial solid solution: calculation of the γ'-Fe_4N_{1-x}–ε-Fe_2N_{1-z} equilibrium
M. I. Pekelharing, A. J. Böttger and E. J. Mittemeijer 1775

Shape memory characteristics in the $L1_0$–fcc order–disorder transformation of FePd
K. Tanaka and K. Morioka 1797

Fracture and cavitation in a constrained thin metal layer under a scale effect in layered materials
S. X. Mao, X. Han and J. M. Wiezorek 1807

Intermediate temperature creep mechanisms in Ni_3Al
J. M. Cairney, T. S. Rong, I. P. Jones and R. E. Smallman 1827

The H atom in $CaTiO_3$: structure and electronic properties
M. Castillo, C. Velasco and A. Stashans 1845

NUMBER 16—1 JUNE

Prediction of kinetic demixing in a quaternary mixed oxide (A, B, C)O in an oxygen potential gradient
M. J. Brown, I. V. Belova and G. E. Murch 1855

Precipitate orientation relationships and interfacial structures in duplex stainless steel Zeron-100
H. Jiao, M. Aindow and R. C. Pond 1867

Constitutive modelling of the densification of micron-grain-sized alumina ceramics
Z. He and J. Ma 1889

Effect of strontium substitution on superconductivity in $YBa_2Cu_4O_8$
A. Kareiva, S. Mathur, J.-E. Jørgensen and S. Tautkus 1917

Growth of iron films on MgO(100) substrates at 560–600 K
B. Wassermann 1929

Comparison of the X-ray photoelectron and electron-energy-loss spectra of the nitrogen-doped hydrogenated amorphous carbon bond
D. A. Zeze, S. R. P. Silva, S. Haq and S. J. Harris 1937

Network topology and dispersive kinks observed by high-resolution photoemission spectroscopy in cuprate high-temperature superconductors
J. C. Phillips 1949

NUMBER 17–18—11 JUNE

Special Issue: Selected Papers from the Fifth International Meeting on Thermodiffusion, Technical University of Denmark, 5–9 August 2002

Selected Papers from the Fifth International Meeting on Thermodiffusion, Technical University of Denmark, 5–9 August 2002
A. Shapiro 1963

Benchmark values for the Soret, thermal diffusion and diffusion coefficients of three binary organic liquid mixtures
J. K. Platten, M. M. Bou-Ali, P. Costesèque, J. F. Dutrieux, W. Köhler, C. Leppla, S. Wiegand and G. Wittko 1965

Precise determination of the Soret, thermal diffusion and mass diffusion coefficients of binary mixtures of dodecane, isobutylbenzene and 1,2,3,4-tetrahydronaphthalene by a holographic grating technique
G. Wittko and W. Köhler 1973

Investigation of the Soret effect in binary liquid mixtures by thermal-diffusion-forced Rayleigh scattering (contribution to the benchmark test)
C. Leppla and S. Wiegand 1989

Precise determination of the Soret, thermodiffusion and isothermal diffusion coefficients of binary mixtures of dodecane, isobutylbenzene and 1,2,3,4-tetrahydronaphthalene (contribution of the University of Mons to the benchmark test)
J. K. Platten, M. M. Bou-Ali and J. F. Dutrieux 2001

Determination of the thermodiffusion coefficient in three binary organic liquid mixtures by the thermogravitational method (contribution of the Universidad del País Vasco, Bilbao, to the benchmark test)
M. M. Bou-Ali, J. J. Valencia, J. A. Madariaga, C. Santamaría, O. Ecenarro and J. F. Dutrieux 2011

Measuring the Soret coefficient of binary hydrocarbon mixtures in packed thermogravitational columns (contribution of Toulouse University to the benchmark test)
P. Costesèque and J.-C. Loubet 2017

Fast-onset Soret-driven convection in a colloidal suspension heated from above
R. Cerbino, A. Vailati and M. Giglio 2023

Onset of Rayleigh–Bénard convection in a ternary liquid system and the Onsager law with generalized thermal diffusion
J.-F. Dutrieux, G. Chavepeyer, M. Marcoux and M. Massoutier 2033

Determination of the apparent negative Soret coefficient of water–10% alcohol solutions by experimental and numerical methods in packed cells
P. Costesèque, S. Gaillard, Y. Gachet and Ph. Jamet 2039

Micro-thermal field-flow fractionation: new challenge in experimeatal studies of thermal diffusion of polymers and colloidal particles
J. Janca 2045

Investigation of the sign of the Soret coefficient in different ionic and surfacted magnetic colloids using forced Rayleigh scattering and single-beam Z-scan techniques
S. Alves, G. Demouchy, A. Bee, D. Talbot, A. Bourdon and A. M. Figueiredo Neto 2059

Thermal diffusion in ionic micellar solutions
R. Piazza 2067

Molecular dynamics study of thermal diffusion in a binary mixture of alkanes trapped in a slit pore
J. Colombani, G. Galliéro, B. Duguay, J.-P. Caltagirone, F. Montel and P. A. Bopp 2087

On thermal diffusion in binary and ternary Lennard-Jones mixtures by non-equilibrium molecular dynamics
G. Galliéro, B. Duguay, J.-P. Caltagirone and F. Montel 2097

Influence of thermal boundary conditions on the double-diffusive process in a binary mixture
M. Chacha, M. Z. Saghir, S. Van Vaerenbergh and J. C. Legros 2109

Analytical and numerical exploration of oscillatory convection in porous media
S. Gaillard, D. Fargue and P. Jamet 2131

The onset of thermomagnetic convection in stratified ferrofluids
M. I. Shliomis, B. L. Smorodin and S. Kamiyama 2139

Convective instability of the thermovibrational flow of binary mixture in the presence of the Soret effect
B. L. Smorodin and B. I. Myznikova 2155

Evaluation of the thermodynamic models for the thermal diffusion factor
M. G. Gonzalez-Bagnoli, A. A. Shapiro and E. H. Stenby 2171

Polymer thermophoresis in solvents and solvent mixtures
M. E. Schimpf and S. N. Semenov 2185

Mechanism of particle thermophoresis in pure solvents
S. N. Semenov 2199

Macroscopic model of multicomponent fluids in porous media
B. Wilbois, G. Galliero, J.-P. Caltagirone and F. Montel 2209

NUMBER 19—1 JULY

Grain-boundary faceting at a $\Sigma = 3$, [110]/{112} grain boundary in a cubic zirconia bicrystal
N. Shibata, F. Oba, T. Yamamoto, T. Sakuma and Y. Ikuhara 2221

Slip-accommodated superplastic flow in Zn–22 wt%Al
Y. Xun and F. A. Mohamed 2247

Residual stresses in continuous-tungsten-fibre-reinforced Kanthal-matrix composites
P. Rangaswamy, I. J. Beyerlein, M. A. M. Bourke, M. B. Prime, A. K. Saigal and T. O. Williams 2267

On the packing of $AuCu_3$ and Cu_2Mg structures
M. L. Bhatia.....2293

***Ab initio* modelling of boron and nitrogen in diamond nanowires**
A. S. Barnard, S. P. Russo and I. K. Snook 2301

***Ab initio* modelling of dopants in diamond nanowires: II**
A. S. Barnard, S. P. Russo and I. K. Snook 2311

NUMBER 20—11 JULY

Ball milling of $Fe_{40}Ni_{40}P_{20-x}Si_x$ ($x = 6$, 10 and 14): production and characterization
J. J. Suñol, T. Pradell, N. Clavaguera and M. T. Clavaguera-Mora 2323

Internal-friction study of the interstitial–substitutional effect on the deformation behaviour of Nb–O, Nb–Ta–O and Nb–Mo–O single crystals
E. Miura, K. Ota, K. Yoshimi and S. Hanada 2343

Solidification microstructure of as-cast Mg–Zn–Y alloys
J. B. Ok, I. J. Kim, S. Yi, W. T. Kim and D. H. Kim 2359

Crystallization behaviour in a new multicomponent $Ti_{16.6}Zr_{16.6}Hf_{16.6}Ni_{20}Cu_{20}Al_{10}$ metallic glass developed by the equiatomic substitution technique
K. B. Kim, Y. Zhang, P. J. Warren and B. Cantor 2371

Fast and reliable evaluation of lattice distortions from convergent-beam electron diffraction patterns
Z. Lu, F. Pyczak, S. Krämer, H. Biermann and H. Mughrabi 2383

Correlated tracer diffusion in an ordered interface structure
I. V. Belova and G. E. Murch 2399

The influence of efficient atomic packing on the constitution of metallic glasses
D. B. Miracle, W. S. Sanders and O. N. Senkov 2409

NUMBER 21—21 JULY

Assessment of the fatigue crack closure phenomenon in damage-tolerant aluminium alloy by *in-situ* high-resolution synchrotron X-ray microtomography
H. Toda, I. Sinclair, J.-Y. Buffière, E. Maire, T. Connolley, M. Joyce, K. H. Khor and P. Gregson 2429

Dislocation motion in icosahedral quasicrystals at elevated temperatures: numerical simulation
G. D. Schaaf, J. Roth and H.-R. Trebin 2449

Thermodynamics of phonon-stabilized Fermi distributions with application to uranium
M. E. Manley 2467

Thermal desorption of carbon monoxide from Mo(110)
M. Juel and S. Raaen 2475

Strongly anisotropic s-wave gaps in exotic superconductors
B. H. Brandow 2487

A new ferromagnetic thiospinel $CuCrZrS_4$ with re-entrant spin-glass behaviour
Y. Iijima, Y. Kamei, N. Kobayashi, J. Awaka, T. Iwasa, S. Ebisu, S. Chikazawa and S. Nagata 2521

Defects and localized states in dilute $GaAs_{1-x}N_x$ solid solutions prepared by molecular-beam epitaxy
A. Y. Polyakov, N. B. Smirnov, A. V. Govorkov, V. T. Bublik, A. E. Botchkarev, J. A. Griffin, D. K. Johnstone, T. Steiner and S. N. Mohammad 2531

NUMBER 22—1 AUGUST

Influence of hydrogenation on the microstructure and crystallization of Zr–Cu–Ni–Al–Y metallic glass
R. M. Wang and D. Eliezer 2545

Crystallization of isolated amorphous zones in semiconductors
I. Jenčič, E. P. Hollar and I. M. Robertson 2557

Large two-dimensional clusters of equal-area bubbles: the influence of the boundary in determining the minimum-energy configuration
S. J. Cox and F. Graner 2573

The transition from localized to homogeneous plasticity during nanoindentation of an amorphous metal
C. A. Schuh, A. S. Argon, T. G. Nieh and J. Wadsworth 2585

Temporal fluctuation and its power law in the crystalline-to-glass transition during electron irradiation
S. Watanabe, M. Hoshino, T. Koike, T. Suda, S. Ohnuki, H. Takahashi and N. Q. Lam 2599

Site-specific long-range order in $^{57}Fe_3Al$ measured by Mössbauer diffractometry
J. Y. Y. Lin and B. Fultz 2621

On the origin of compositional fluctuations in $ZnSe_{1-x}S_x$ alloys grown by metal–organic vapour-phase epitaxy
A. C. Wright and N. Maung 2641

NUMBER 23—11 AUGUST

On the annealing of junction disclinations in deformed polycrystals
D. V. Bachurin and A. A. Nazarov 2653

Characteristics and origin of clusters in submicron WC–Co cermets
S. Lay and M. Loubradou 2669

Internal stress and heterogeneous dislocation structure in creep
A. Orlová and F. Dobeš 2681

Sintering of a bcc structure of spherical particles of equal and different sizes
P. Redanz and R. M. McMeeking 2693

Lattice-diffusion-controlled rotation of crystals about a common interface
B. Burton 2715

Oxygen generation in anodized Ta–Cu alloys
S. Mato, G. Alcala, P. Skeldon, G. E. Thompson, T. Quance, M. J. Graham, H. Habazaki, K. Shimizu and D. Masheder 2733

Dilatancy in liquid foams
D. Weaire and S. Hutzler 2747

NUMBER 24—21 AUGUST

A six-dimensional approach to microtexture analysis
H. F. Poulsen 2761

The effects of surface topography on the accumulation of biofouling
A. Kerr and M. J. Cowling 2779

Eutectic isolation in Mg–Al–Cu–Li(–Y) alloys by centrifugal processing
J. F. Löffler, S. Bossuyt, A. Peker and W. L. Johnson 2797

A combined resonance–Doppler technique for studying bubble evolution in liquids
N. N. Sinha 2815

The non-Fermi-liquid nature of the metallic states of the Hubbard Hamiltonian
B. Farid 2829

NUMBER 25—1 SEPTEMBER

Kinetics of β-phase transformation in the heat treatment of $FeSi_2$- and Fe_2Si_5-based thermoelectric alloys
T. J. Zhu, X. B. Zhao and L. Lü 2865

Atomic force microscopy study on microstructural changes by 'training' in Fe–Mn–Si-based shape memory alloys
D. Z. Liu, S. Kajiwara, T. Kikuchi and N. Shinya 2875

Effects of topography on the local variation in the magnetization of ultrasoft magnetic films: a Lorentz microscopy study
N. G. Chechenin, J. Th. M. De Hosson and D. O. Boerma 2899

Transmission electron microscopy investigation of domains and boundaries in bulk $La_{2/3}Ca_{1/3}MnO_3$
D. D. Liang, C. H. Lei, Q. Y. Xu and Y. Ding 2915

Polarization–depolarization process in glass during percussion drilling
A. Rabinovitch, V. Frid, J. Goldbaum and D. Bahat 2929

Intrinsic nanoscale phase separation of bulk As_2S_3 glass
D. G. Georgiev, P. Boolchand and K. A. Jackson 2941

Effect of hydrogen dilution on the optical properties of hydrogenated amorphous silicon–nitrogen films prepared by plasma deposition
M. Yamaguchi and K. Morigaki 2955

NUMBER 26—11 SEPTEMBER

Approaching the dry limit in foam
N. Kern and D. Weaire 2973

Devitrification behaviour of Cu–Zr–Ti–Pd bulk glassy alloys
D. V. Louzguine, A. R. Yavari and A. Inoue 2989

The evolution of the lattice parameter mismatch of a nickel-based superalloy during a high-temperature creep test
A. Jacques and P. Bastie 3005

Orientation dependence of texture evolution in cold-rolled Ni_3Al single crystals
K. Kishida, M. Demura, Y. Suga and T. Hirano 3029

One-dimensional models of thermal activation under shear stress
F. R. N. Nabarro 3047

Muon spin rotation in $GdSr_2Cu_2RuO_8$: implications
D. R. Harshman, J. D. Dow, W. J. Kossler, D. R. Noakes, C. E. Stronach, A. J. Greer, E. Koster, Z. F. Ren and D. Z. Wang 3055

Nanostructures and deformation mechanisms in a cryogenically ball-milled Al–Mg alloy
X. Z. Liao, J. Y. Huang, Y. T. Zhu, F. Zhou and E. J. Lavernia 3065

NUMBER 27—21 SEPTEMBER

Crack initiation and termination in III–V epitaxial layers
R. T. Murray, G. Hill, M. Hopkinson and P. J. Parbrook 3077

A systematic study of irrational precipitation crystallography in fcc–bcc systems with an analytical O-line method
D. Qiu and W.-Z. Zhang 3093

A mechanism for spontaneous relaxation of glass at room temperature
S. V. Nemilov and G. P. Johari 3117

Dislocation climb and low-temperature plasticity of an Al–Pd–Mn quasicrystal
F. Mompiou, L. Bresson, P. Cordier and D. Caillard 3133

On the reorientation transition in Cu(100)/Ni_n/H
R. Hammerling, J. Zabloudil and S. Gallego 3159

Physical properties of the β-Ti_6Sn_5 system
F. Drymiotis, J. C. Lashley, Z. Fisk, E. Peterson and S. Nakatsuji 3169

Erratum 3179

NUMBER 28—1 OCTOBER

In-plane and out-of-plane anisotropic magnetoresistances in $La_{1-x}Pb_xMnO_3$ thin films
D. K. Aswal, A. Singh, C. Thinaharan, S. M. Yusuf, C. S. Viswanadham, G. L. Goswami, L. C. Gupta, S. K. Gupta, J. V. Yakhmi and V. C. Sahni 3181

Relaxation in Ni–Mn–Ga ferromagnetic shape memory alloys
X. Jin, D. Bono, C. Henry, J. Feuchtwanger, S. M. Allen and R. C. O'Handley 3193

Strain relaxation in the epitaxy of $La_{2/3}Sr_{1/3}MnO_3$ grown by pulsed-laser deposition on $SrTiO_3$(001)
J.-L. Maurice, F. Pailloux, A. Barthélémy, O. Durand, D. Imhoff, R. Lyonnet, A. Rocher and J.-P. Contour 3201

Microstresses in textured polycrystals studied by the multireflection diffraction method and self-consistent model
A. Baczmański, C. Braham and W. Seiler 3225

A model for coexistent superconductivity and ferromagnetism
J. A. Jackiewicz, K. B. Blagoev and K. S. Bedell 3247

Nanoscopic filters as the origin of d-wave energy gaps
J. C. Phillips 3255

Network topology and subgap resonances observed by Fourier transform scanning tunnelling microscopy of cuprate high-temperature superconductors
J. C. Phillips 3267

NUMBER 29—11 OCTOBER

Indexing schemes for quasilattices
E. A. Lord 3283

Computer modelling of ion migration in zirconia
M. Kilo, R. A. Jackson and G. Borchardt 3309

Analysis of ball-milled Mo powder using X-ray diffraction
T. C. Bor, M. C. Huisman, J.-D. Kamminga, R. Delhez and E. J. Mittemeijer 3327

Field-enhanced electrical transport mechanisms in amorphous carbon films
C. Godet, S. Kumar and V. Chu 3351

The influence of morphology on grain-boundary and twin-boundary bainite growth kinetics at the bay in Fe–C–Mo
R. E. Hackenberg and G. J. Shiflet 3367

NUMBER 30—21 OCTOBER

Three-dimensional finite-element simulation of Zener pinning dynamics
G. Couturier, C. Maurice and R. Fortunier 3387

Cyclic deformation behaviour and saturation bundle structure in Ti–5 at.% Al single crystals deforming by single prism slip
L. Xiao and Y. Umakoshi 3407

Experimental investigations of the normal loading of elastic spherical and conical indenters on to elastic flats
Y. Y. Lim and M. M. Chaudhri 3427

Isothermal creep of bulk glassy $Zr_{52.5}Ti_5Cu_{17.9}Ni_{14.6}Al_{10}$ below T_g
M. Ohta, A. E. Berlev, V. A. Khonik and K. Kitagawa 3463

NUMBER 31–34—1 NOVEMBER–1 DECEMBER

Special Issue: Multiscale Modelling of Nano- and Micro-mechanics of Materials

Preface
N. M. Ghoniem, E. P. Busso and H. Huang 3473

Multiscale modelling of nanomechanics and micromechanics: an overview
N. M. Ghoniem, E. P. Busso, N. Kioussis and H. Huang 3475

***Ab initio* calculation of tensile strength in iron**
M. Friák, M. Šob and V. Vitek 3529

A nonplanar Peierls–Nabarro model and its application to dislocation cross-slip
G. Lu, V. V. Bulatov and N. Kioussis 3539

A computational framework for modelling grain-structure evolution in three dimensions
M. O. Bloomfield, D. F. Richards and T. S. Cale 3549

Atomistic simulation of dislocation emission in nanosized grain boundaries
P. M. Derlet, H. Van Swygenhoven and A. Hasnaoui 3569

Coherent motion of interstitial defects in a crystalline material
S. L. Dudarev 3577

Radiation damage near grain boundaries
M. Samaras, P. M. Derlet, H. Van Swygenhoven and M. Victoria 3599

Dislocation nucleation in the initial stage during nanoindentation
H. Y. Liang, C. H. Woo, H. Huang, A. H. W. Ngan and T. X. Yu 3609

Atomic modelling of strengthening mechanisms due to voids and copper precipitates in α-iron
Yu. N. Osetsky, D. J. Bacon and V. Mohles 3623

Linking atomistic and mesoscale simulations of nanocrystalline materials: quantitative validation for the case of grain growth
D. Moldovan, D. Wolf and S. R. Phillpot 3643

Kinetic Monte Carlo simulations of void lattice formation during irradiation
H. L. Heinisch and B. N. Singh 3661

The effects of grain size and dislocation source density on the strengthening behaviour of polycrystals: a two-dimensional discrete dislocation simulation
S. B. Biner and J. R. Morris 3677

Dislocation–impenetrable precipitate interaction: a three-dimensional discrete dislocation dynamics analysis
C. S. Shin, M. C. Fivel, M. Verdier and K. H. Oh 3691

Parametric dislocation dynamics of anisotropic crystals
X. Han, N. M. Ghoniem and Z. Wang 3705

The logarithmic singularity of an accelerating edge dislocation
L. Ni and X. Markenscoff 3723

The importance of being curved: bowing dislocations in a continuum description
R. Sedláček, J. Kratochvíl and E. Werner 3735

Critical thickness for dislocation generation in epitaxial piezoelectric thin films
B. Wang, C. H. Woo, Q. Sun and T. X. Yu 3753

Theory of Frank loop nucleation at elevated temperatures
A. A. Semenov and C. H. Woo 3765

A method for linking thermally activated dislocation mechanisms of yielding with continuum plasticity theory
C. S. Hartley 3783

Coarse-grained descriptions of dislocation behaviour
R. LeSar and J. M. Rickman 3809

Reaction–diffusion approach to nanostructure formation during thin-film deposition
D. Walgraef 3829

Nanoscale copper oxide ring structure on an $SrTiO_3$ substrate
A. El-Azab and Y. Liang 3847

Deformation structures developing on fine scales
D. A. Hughes and N. Hansen 3871

A multiscale approach for coupled phenomena in fcc materials at high temperatures
S. Dumoulin, E. P. Busso, N. P. O'Dowd and D. Allen 3895

Grain-boundary interfaces and void interactions in porous aggregates
W. M. Ashmawi and M. A. Zikry 3917

Constitutive equations for twinning and slip in low-stacking-fault-energy metals: a crystal plasticity-type model for moderate strains
M. Cherkaoui 3945

NUMBER 35—11 DECEMBER

Experimental and computational creep characterization of Al–Mg solid-solution alloy through instrumented indentation
H. Takagi, M. Dao, M. Fujiwara and M. Otsuka 3959

Development of new interatomic potentials appropriate for crystalline and liquid iron
M. I. Mendelev, S. Han, D. J. Srolovitz, G. J. Ackland, D. Y. Sun and M. Asta 3977

Atomic-scale simulation of intergranular segregation of H in Al–Mg: implications for H-induced damage
D. Tanguy and T. Magnin 3995

***In-situ* transmission electron microscopy study of dislocation processes at precipitate-free zones in a γ'-strengthened superalloy**
D. Baither, T. Krol and E. Nembach 4011

Atom location by channelling-enhanced microanalysis and the ordering of Ti_2AlNb
P. M. Sarosi, J. A. Hriljac and I. P. Jones 4031

NUMBER 36—21 DECEMBER

On the powder diffraction pattern of crystals with stacking faults
E. Estevez-Rams, M. Leoni, P. Scardi, B. Aragon-Fernandez and H. Fuess 4045

Strength of free-standing chemically vapour-deposited diamond measured by a range of techniques
A. R. Davies, J. E. Field and C. S. J. Pickles 4059

High-resolution transmission electron microscopy and computational analyses of atomic structures of [0001] symmetric tilt grain boundaries of Al_2O_3 with equivalent grain-boundary planes
K. Matsunaga, H. Nishimura, T. Saito, T. Yamamoto and Y. Ikuhara 4071

Molecular dynamics studies of displacement cascades in the uranium dioxide matrix
L. Van Brutzel, J.-M. Delaye, D. Ghaleb and M. Rarivomanantsoa 4083

Structure of dislocations and stacking faults in the complex intermetallic ξ-(Al–Pd–Mn) phase
H. Klein and M. Feuerbacher 4103

Transmission electron microscopy study of the interaction between a glide dislocation and a dislocation node
R. J. McCabe, A. Misra and T. E. Mitchell 4123
